

We take waxing seriously because if you want great looking brows the last thing you want is for them to lift because that does not make good looking brows.

Some serums and creams can make skin more likely to lift and we ask that you discontinue the following for a week prior to your waxing appointment.

- Retinol (anything containing Vitamin A)
- Hyaluronic Acid
- Glycolic Acid
- Salicylic Acid
- Benzoyl Peroxide
- Vitamin C
- Alpha Hydroxy Acids

And we recommend waiting a week after the following services before waxing:

- Chemical Peel
- Microdermabrasion
- Micro-needling
- Any deep exfoliating treatment

If you have any questions give us a call and let's have a chat.
